

Pica F55

Algae, moss and lichen remover HD

Generally:

Pica F55 is a water based algae, moss and lichen remover.

Use:

Pica F55 works on most types of surfaces as, concrete, brick, stone, render, plastics, metal and wood. Pica F55 is Bio-degradable and does not harm the treated surface. Avoid using in sub-zero temperatures or if large amounts of rain is expected.

Directions for use:

- Cover flower beds.
- Brush thick layers of moss from roofs.
- Spray pica F55 on to surface.
- Do not rinse the treated surfaces with water after the treatment. Rain will eventually clean the surface from dirt and undesired biological growth. Clean windows after treatment of superfluous amounts of Pica F55. If the surface is to be cleaned with high pressure equipment; let Pica F55 work for at least 24 hours before treatment. Algae and moss disappear within 1 year, Lichen within 2 years. The treated surface will keep clean for up to 5 years.

Solution to be used:

Dilute with water 1:14 (solution to be used).

Estimated amount to be used:

1 litre solution for every 5m².

Personal protective measures:

- Use protective gloves.
- Wear safety goggles.

Labelling:

Se MSDS

Storage/durability:

Store dark and frost free. Durability about 24 months in sealed original container.

Technical data:

Contains:	Benzalkoniumchloride i.a.
Appearance:	Transparent liquid
Odour:	Neutral
