

Pica 71

pH neutral Graffiti Remover

Generally:

Pica 71 is a pH neutral graffiti remover free from NMP and NMP equivalents like NEP. Pica 71 is a powerful spray can graffiti remover even though it is non-pollutant and harmless to work with. Allow 2-10 minutes for Pica 71 to dissolve the graffiti paint. Pica 71 is excellent to use on painted surfaces since it selectively removes graffiti and, in most cases, does not harm underlying surfaces.

Use:

Use for graffiti removal on most types of painted or unpainted surfaces. Do not use Pica 71 on plastic, rubber or plexiglass surfaces.

Directions for use:

- Spray surface or alternatively coat surface using a paint brush.
- If needed work Pica 71 thoroughly into the graffiti.
- Allow 2-10 minutes for Pica 71 to dissolve the graffiti paint. In cold or wet weather allow for considerably longer time.
- Rinse facade thoroughly with water.
- If needed repeat treatment.

Solution to be used:

Concentrate (pH 7).

Estimated amount to be used:

0,4-0,8 litres/m².

Personal protective measures:

Not needed.

Labelling:

Signal Word: -

Storage/durability:

Store dark and frost free. Durability about 24 months in sealed original container.

Technical data:

Contains:	Solvents i.a.
Appearance:	Yellowish liquid
Odour:	Neutral
