

Pica 781

pH-neutral Graffiti Remover

Generally:

Pica 781 is a viscous pH neutral graffiti remover with excellent adhesive properties to allow for a longer contact time between the graffiti remover and the graffiti. This makes Pica 781 a powerful spray can graffiti remover even though it is non-pollutant and harmless to work with. Pica 781 does not contain NMP or NMP equivalents like NEP. Pica 781 is excellent to use on hard surfaces when you need good results quickly but still want an environmentally friendly product.

Use:

Use for graffiti removal on most types of surfaces. Do not use Pica 781 on plastic, rubber or poly carbonate surfaces.

Directions for use:

- Coat surface using a paint brush or roller.
- If needed work Pica 781 thoroughly into the graffiti.
- Allow 5-30 minutes for Pica 781 to dissolve the graffiti paint. Allow for longer time in cold or wet weather.
- Rinse surface thoroughly with water.

Solution to be used:

Concentrate (pH 7).

Estimated amount to be used:

0,4-0,8 litres/m².

Personal protective measures:

- Use protective gloves.
- Wear safety goggles.

Labelling:

Signal Word: -

Storage/durability:

Store dark and frost free. Durability about 24 months in sealed original container.

Technical data:

Contains:	Ethoxylates, Solvents i.a.
Appearance:	Viscous liquid
Odour:	Neutral
