

Pica 141

Ghost remover

**Generally:**

Pica141 is an alkaline ghost/shadow remover. Due to the fact that Pica 141's pH value is very high enables it to be an extremely efficient shadow and paint remover.

Use:

Pica 141 is mainly used to remove shadows after graffiti removal. Pica 141 can be used on most types of surfaces except aluminium. NB underlying paint may be harmed.

Directions for use:

- Coat surface using a paint brush or roller.
- If needed work Pica 141 thoroughly into the graffiti.
- Allow a minute for Pica 141 to dissolve the graffiti paint.
- Rinse facade thoroughly with water.
- If needed repeat treatment.

Solution to be used:

Concentrate (pH 14).

Estimated amount to be used:

0,2-0,3 litres/m².

Personal protective measures:

- Use protective gloves of rubber or plastic.
- Wear safety goggles or face protection.
- Wear protective clothing.

Labelling:

Signal Word: Danger

**Storage/durability:**

Store dark and frost free. Durability about 24 months in sealed original container.

Technical data:

Contains:	Potassium hydroxide, i.a.
Appearance:	Red brown liquid
Odour:	Neutral
